# 15 REASONS WHY

## Park & Plaza's Fibreglass Planters and Pots must be your first choice

Fibreglass Planters and Pots are made of a composite material formed from fibres of spun glass mixed and held together with resin. Often it is referred to as FRP or fibreglass reinforced plastic. The planter or pot is manufactured using the following process: The resin is mixed and poured into the mould, then brushed on the mould walls. Then sheets of fibreglass are placed in the mould over the resin layer to give the planter or pot structure. It is then that a chemical reaction takes place. The fibreglass and the resin heat up and harden. This creates a product of immense strength with similar properties to steel but at only a quarter of the density. Therefore when you are choosing your planters or pots, fibreglass is the natural choice. We only use the highest quality fibreglass to manufacture our planters and pots.

### 01 LIGHTWEIGHT

Compared to stone, concrete, timber or metal pots and planters, they are very lightweight. This means that they can be easily moved from indoors to outdoors or indeed wherever you need them.

### 02 STRENGTH

As previously mentioned, it has the properties of steel at 25% of the weight. Also, it has a high strength to weight ratio.

### 03 CORROSION FREE

Our fibreglass products are totally resistant to aggressive chemicals, alkalis, and liquids. They resist the harsh effects of weathering, degradation, and aging, producing an extremely long and more efficient life. Plastic pots and planters dry and crack, metal planters rust, and wooden containers splinter and rot. Fibreglass is also shatterproof and frost resistant, therefore you can leave them outdoors when it is raining, snowing, or when it is sunny and hot.

### 04 UV RESISTANT

They won't be affected by UV rays. You will never need to worry about the colour fading.

### 05 GREAT VALUE FOR MONEY

You won't need to replace your pots and planters every couple of years. They keep on going virtually forever and they always look great.

### 06 DESIGNS AND SHAPES

Because of the method used to manufacture the fibreglass planters and pots, the shapes, styles, designs, and colours are endless. You will see from our exclusive range that we even produce planters in the shapes of pianos and coffee cups.

### 07 EASILY MAINTAINED

They really don't require maintenance. Just a wipe over with a damp rag with maybe some light detergent will bring back their shiny appearance.

08

### CUSTOM MADE

: All of our planters and pots are specifically manufactured to your exact requirements. Because there are 1000 colours available in the pantone range and the combinations would be in the hundreds of thousands plus the dimensions can be altered as required each product is painstakingly created to your precise specifications.

09

### THE LOOK

Fibreglass can be made to mimic all sorts of materials. They can be made to look like timber, stone, timber or whatever material you choose.

11

### FLEXIBILITY

Because of the nature of their manufacture they can be used indoors and outdoors with the same confidence.

10

### NON TOXIC

Unlike plastic planters where coloured pigment mixed with plastic can be toxic. With fibreglass the automotive paint and glaze is applied to the outer surface of the planter and pot. Therefore they can be used for growing fruit trees, strawberries, blueberry bushes or vegetables without a worry.

12

### RECYCLABLE & HIGHLY SUSTAINABLE

Fibreglass Reinforced Plastic or FRP can be recycled. Varied techniques can be implemented to develop different components. These products can be formed by making use of recycle material that is generated by crushing the composites.

13

### STYLISH & THEY WILL PERFECTLY COMPLEMENT YOUR PLANTS

They look great and they bring out the best of your plants. Being highly decorative, an elegant planter can be used as a centerpiece in a lobby or foyer. Colours can be used in any combination to complement or contrast with your decor.

14

### ISO 9001

All of our products are manufactured under the international quality control process. That means that every pot and planter is thoroughly inspected at various stages during the production process. If any unit does not meet the standard it is rejected and junked.

15

### BUREAU VERITAS

We have appointed Bureau Veritas to complete final inspections on all of our products prior to shipping. Bureau Veritas are an inspection service that was originally started in 1828. This ensures that when products are delivered they are the exact quality that you would expect.

## EXCLUSIVE FIBREGLASS PLANTERS

Our commercial Exclusive Fibreglass Planters are created from the highest quality fiberglass and paints available. To ensure this is the case our manufacturing partner has their own fiberglass factory developing the raw material for our planters.

We have 50 + planters in every shape possible They will enhance any environment both indoors and outdoors and you won't find 90 % of them anywhere else in Australia Whether you are looking for a planter for a tree or small plants we have the units that will suit you.
